

# LIFEBREATH<sup>®</sup>

INDOOR AIR SYSTEMS

*Breathe easy*

## Bathroom Exhaust System

The new BES is the perfect way to ventilate specific locations with a Clean Air Furnace. The BES allows you to exhaust multiple areas quietly and economically while also providing heat recovery through the Clean Air Furnace integrated heat recovery core.

Part # 99-CAF-BESKIT

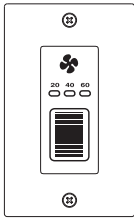

### Features

- BES Control Box
- Quantum 4/5/6 COMBI Fan
- Fan Speed Selection

## Bathroom Exhaust System (BES) Layout

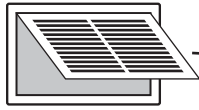

### Optional Digital Electronic Timer (Part No. 99-104)

The digital electronic timer (DET) will initiate high speed fan operation for 20, 40 or 60 minutes. Install one DET at each exhaust location. Refer to "Remote Control Devices".

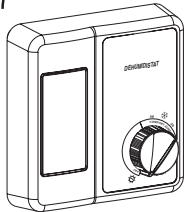

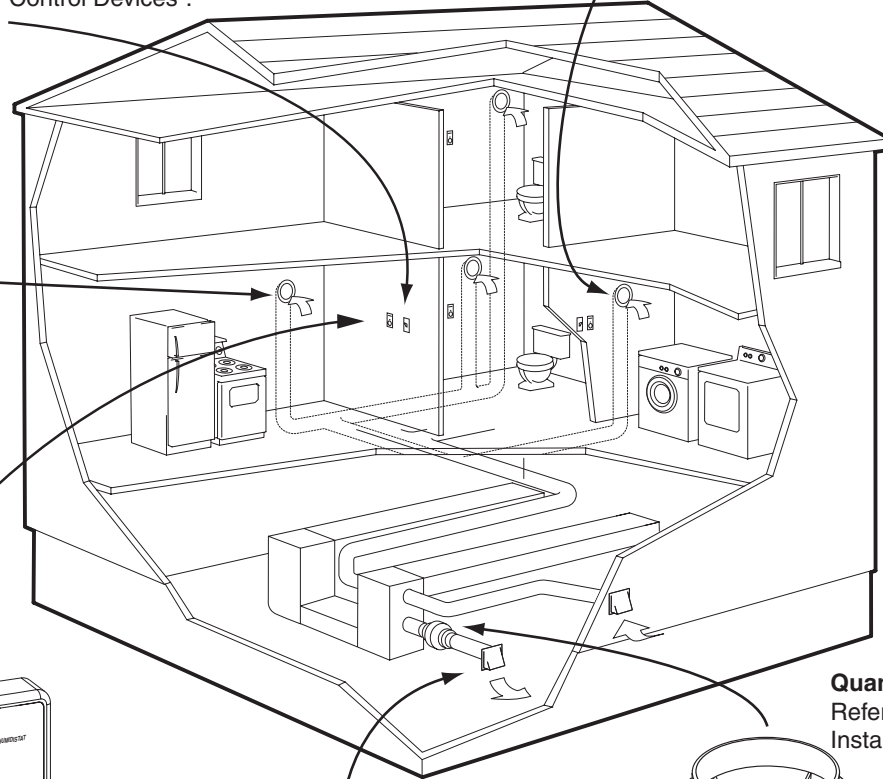

### Optional Adjustable Techgrille

Adjustable Techgrilles exhaust the stale air. Refer to "Grilles and Weatherhoods".

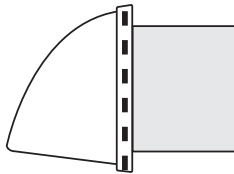

### Kitchen Exhaust Grille

Refer to "Grilles and Weatherhoods".

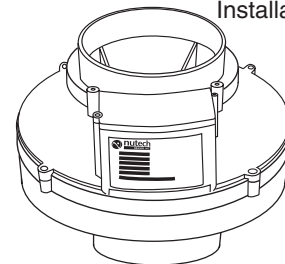

### Optional Remote Dehumidistat (Part No. 99-130W)

Dehumidistat initiates high speed fan operation when humidity level exceeds selected setting. Refer to "Remote Control Devices".

### Lifebreath Weatherhood

Refer to "Grilles and Weatherhoods".

### Quantum COMBI Fan

Refer to "Inline Fan Installation".

The Lifebreath Bathroom Exhaust System provides high speed bathroom exhaust.

Design the duct work so you can exhaust from the bathrooms, laundry room and kitchen- anywhere you would normally use a separate surface mounted exhaust fan.
